

PTC-258 – Abbeville Sign Project

Questions and Answers

I submitted a question regarding this request and I did not receive a response.

We are only accepting Daktronics' equipment to stay consistent with what we already have on our campuses.

Kevin: The specification specifies a Daktronics model and does not indicate that an "or equal" is acceptable. Daktronics competes against us across the United States and I have bid numerous projects in South Carolina. Since this is a State project is an or equal is acceptable for this project?

We are only accepting bids for Daktronics' units in order to stay consistent with what we have on our campuses currently.

I ran across a project where you all are requesting a quote for an electronic message center that bids on 1/24/2014. The Dodge reports indicate this is a Daktronics brand unit. If so, are you accepting substitutions or is there a specific Daktronics model that you are looking for? Please let me know how I can obtain the bid documents for this project as I would appreciate the opportunity to provide you a proposal.

We are only accepting bids for Daktronics' units in order to stay consistent with what we have on our campuses currently. Please see our website for the bid and the drawing, www.ptc.edu/procurement.

Does the LED unit have to be a Daktronics unit or can it be equivalent or better?

By two single sided units, do you mean to create one sign with the units back to back? Or will each unit be installed on separate signs?

Please confirm wireless remote control for unit.

Since we specified / sole source Daktronics – and this is PTC standard – I recommend we stick with Daktronics.

Units will be back to back – on one sign

Do you know the distance between the sign and computer that will be used to program the sign and is it line of sight?

Less than 1000 ft – direct line of site.

I have a question pertaining to the above bid for the Daktronics LED sign for Abbeville. On page 3, you state Product Support 10 years. Can you clarify what you mean by product support. Is this technical phone support or labor warranty support?

The intent is product parts available.
