(864) 941-8420  
Buis.P@ptc.edu

Dan Blakely, Director  
PTC Center for Advanced  
Manufacturing  
(864) 682-3702 Ext. 2001  
Blakely.D@ptc.edu

## What is the Manufacturing Job Readiness Workshop?

The idea of manufacturing as a dirty and dangerous workplace is far from the truth today. As automation has expanded in manufacturing, many industries now resemble high tech laboratories. The Manufacturing Job Readiness Workshop is a short term training program funded through scholarships/grants that will prepare participants to pursue jobs in manufacturing by teaching basic production, quality, and job readiness soft skills. As a manufacturing worker, your job duties could typically include producing products on a daily basis, assembling parts and working to help a plant meet production and financial goals for its organization. Employers are **ready to fill** these positions. Average starting salary is \$12/hour, and in some places, higher. Qualified participants who successfully complete this program are eligible to interview with participating companies.

## What is included in this training?

- Quality Overview
- Precision Measurement (Blueprint Reading, Using Calipers & Micrometers)
- Soft Skills (Communication, Teamwork, Ethics), Interview Skills
- Work Keys Test Preparation
- OSHA 10 General Industry
- Lean Six Sigma Yellow Belt
- Forklift Driving & Safety Training
