RATIONALE

Why do I need this course?

Quality financial management is essential to our free enterprise system, the economic health of businesses and to our nation. Because of its importance, finance should be thoroughly understood by managers and accountants in order to make sound decisions. Managers and accountants must work in a rapidly changing environment depending greatly on personal computers to assist in their analysis of financial decisions. While the quantitative analysis can be easily mastered, the financial environment has become complex and ever changing. This volatility has caused profound changes in corporate financial policies and practices. The study of financial management contributes to a better understanding of the information presented, its limitations, and opportunities.

This course meets the needs of accounting and business management majors by providing them with advanced finance skills which will aid in making sound economic decisions.
